About the Companion Card

The Victorian Companion Card was developed to promote the rights of people with a disability to fair ticketing. Companion Card is for people with a significant permanent disability, who always need a companion to provide attendant care type support in order to participate at most available community venues and activities. Please go to page 15 and 16 for more information.

Eligibility criteria

To receive a Victorian Companion Card, the person must:
1. be a permanent resident of Australia and residing in Victoria
2. demonstrate that they have a significant, permanent disability
3. demonstrate that, due to the impact of the disability, they would be unable to participate at most community activities without attendant care support
4. demonstrate that the need for this level of attendant care will be lifelong.

Attendant care support includes significant assistance with mobility, communication, self-care or learning, where the use of aids, equipment or alternative strategies does not enable the person to carry out these tasks. The Companion Card will not be issued for conditions with infrequent or unexpected events such as allergic reactions, falls or medical emergencies.

The Companion Card is not issued to every person who has a disability.
The card is issued to people who can demonstrate that they would not be able to participate at most venues and activities without attendant care, and that this need can be demonstrated to be lifelong.

People on NDIS Plan are not automatically eligible for a Companion Card. Each application will be assessed against the Companion Card eligibility criteria.

Companion Cards cannot be issued if the applicant may become independent in the future as a result of treatment/management, training, recovery or developmental improvements.

Companion Card terms and conditions

It is important that the applicant reads and understands the information below:

1. The Companion Card must only be used when the cardholder requires the assistance of a companion to participate at a particular venue/activity.

2. Only the person whose photograph and details appear on the Companion Card can use the card.

3. Companion Tickets cannot be used without the Companion Card cardholder being present.

4. Companion Card cardholders must inform the venue/activity operator of their requirement for a Companion Ticket at the time they book or purchase their own ticket.

5. Acceptance of the Companion Card does not indicate that a venue/activity is accessible. Cardholders are advised to check accessibility with the venue/activity operator before booking tickets.

6. The minimum expectation of Companion Card affiliates is that they will issue cardholders with one Companion Ticket, or admission, at no charge. This ticket will be exempt from all booking fees.

7. Where a cardholder has a requirement for more than one companion, this must be negotiated by the cardholder with the venue/activity operator at the time of booking.

8. The Companion Card can be used to obtain admission for any programs, services and sessions run by affiliated venue/activity operators. This will be subject to the usual admission availability and conditions.

9. The Companion Card can be used in conjunction with any recognised concession cards.

10. Cardholders must provide their Companion Card details when making telephone bookings and must present their valid card during ticket collection, and at any time when asked during the activity. If cardholders cannot present their card, they may be charged for the Companion Ticket.

11. Affiliated venues/activities must ensure cardholders are able to be located physically close to their companions. Companions must remain close to cardholders to assist them as required. Cardholders with specific seating requirements must inform the venue/activity operator at the time of booking.

12. Some venue/activity operators may charge for participation over and above general admission costs (such as a fee for rides in addition to an entry fee at a fun park). Affiliated venues/activities must issue a Companion Ticket for both admission and for additional components, such as rides, if the cardholder requires assistance in order to participate.

13. Companion Cards may be used to purchase a package deal for the cardholder that combines admission costs with ancillary components such as meals. When booking a package deal, cardholders must check with the venue/activity operator what is included with the Companion Ticket. It is essential that the companion’s support to the cardholder is not disrupted if the ancillary components are not included in the Companion Ticket (for example, if meals are not included, the Companion must be able to bring or access food in a manner that enables them to provide continual support to the cardholder).

14. Booking and ticket distribution practices for Companion Tickets should not be more difficult than the standard ticketing practices of the affiliated venue/activity.

15. If an affiliated venue/activity operator suspects that a Companion Card is being misused, they can report this to the Companion Card program. Proven misuse of the Companion Card may result in the card being cancelled, and the cardholder will be ineligible to reapply.

16. It is understood that the applicant accepts the Companion Card cardholder terms and conditions when they submit a cardholder application form.
Companion Card information

Companion Card – Victoria

Legislation mandates that people with a disability have a right to equal participation in the community without discrimination when a companion / carer is required to facilitate this access. The Companion Card was developed to assist people with a significant and permanent disability to access the community and participate in activities through ticketing arrangements which enable the card holder to purchase two tickets for the price of one. The wallet sized card is issued in the name of the person with the disability and may be transferred to a different companion for each event.

To be eligible for a Companion Card in Victoria, a person must:

1. Be a permanent resident of Australia and residing in Victoria
2. Demonstrate that they have a significant and permanent disability
3. Demonstrate that due to the impact of their disability, they are unable to participate at most community activities without attendant care support
4. Demonstrate that their need for this level of support will be lifelong

The diagnosis of a medical condition or the presence of a disability does not automatically qualify a person for a Companion Card. The disability needs to be permanent (see over page for examples) and a card cannot be issued if improvement is possible. Applicants are required to demonstrate their need for attendant care support when attending venues and events.

Attendant Care definition

Attendant care may be provided by a friend, a family member or a paid carer. Attendant care includes significant assistance with mobility, communication, self-care or cognition where the use of aids, equipment or alternative strategies does not enable the person to carry out tasks independently. Attendant care support does not include providing reassurance or encouragement nor can it be for infrequent or unexpected events or medical emergencies.

Companion Card Affiliates

Businesses enrolled as members of the program (affiliates) or those that recognize the card do not receive compensation for the revenue they forgo in admitting two people for the price of one ticket. Consequently Companion Card has strict eligibility requirements to reassure participating businesses that any cardholder legitimately requires attendant care support when accessing their venue.

The role of Health Professionals and Service Providers

The initial application review involves assessment of the clinical indicators and functional limitations recorded on the form. In order for Companion Card staff to progress an application, supporting information is required regarding the applicant’s level of dysfunction in addition to the level and type of assistance required in the following areas (where relevant): cognition, mobility, communication and activities of daily living.

Health professionals and service providers are encouraged not to advise clients on their entitlement to a card. Importantly, their role is to provide comprehensive and detailed information in the application regarding their client’s/patient’s incapacity and the level of dysfunction. This will enable the Companion Card staff to make an informed decision about the support needs of the applicant. If this information is not provided with the initial application, additional information will be requested. Over the page are examples of medical conditions and indicators that have been used by Companion Card staff to make informed decisions about an applicant’s eligibility.
Eligibility Indicators of the Companion Card

Examples of accepted indicators of an applicant’s eligibility

- Severe Autism – as defined by a CARS Assessment.
- Autism in combination with intellectual disability.
- Moderate to severe intellectual disability – as defined by a psychological assessment.
- Down Syndrome
- Significant and severe conditions that cannot be controlled by medication or other treatment/intervention.
- Uncontrolled epilepsy with frequent seizures (e.g., More than weekly).
- Osteogenesis imperfecta
- Spinal Injuries – high level assistance.
- Progressive neurological conditions – where the level of impairment/disfunction is significant and advanced.
- Cognitive issues where impairment is significant (e.g., advanced dementia/ABI).
- Major organ failure where treatment/transplant surgery is not possible.
- Combination of conditions in applicants who are 90+ years old.
- Legally blind, where visual acuity scores are less than 6/60 with corrected vision.
- Motor neurone disease.
- Muscular Dystrophy
- Parkinson’s Disease – with mobility problems.

Examples of indicators that are NOT accepted when independent of other conditions

- Conditions which fluctuate in the level of dysfunction.
- Conditions that could be considered ‘episodic’ where the need for attendant care is just ‘in case’ (controlled epilepsy/cardiac arrest risk).
- Attention Deficit Hyperactive Disorder/Attention Deficit Disorder/Asperger’s.
- Chronic Fatigue Syndrome.
- Psychiatric conditions that are likely to respond to treatment.
- Minor orthopedic conditions (osteoarthritis/joint replacements).
- Conditions that have the potential to or are likely to improve with time or treatment (e.g., surgery, rehabilitation, recovery, training or medication management).
- Conditions where the incapacity is temporary.
- Minor communication problems.
- People requiring assistance due to accessibility limitations of a particular venue.
- Obesity.
